

Independent Workplace

Project-based, flexible working, whether in a team or alone – with the Independent Workplace from BACHMANN, cutting-edge features are no longer just a vision of the future. Various scenarios can already be incorporated into daily routines today. From mobile touchdown areas to fully fledged workplaces: the Independent Workplace's modular system enables maximum flexibility.

Irrespective of the power supply system and traditional building infrastructure, the wireless workplace can be flexibly and portably positioned wherever it is needed. The Independent Workplace is supplied as an expandable system kit. It comprises coordinated components that ensure the desired mobility and spontaneity. Thanks to an innovative battery system, it lasts a full working day.

A Power Distribution Unit in the form of a multi-converter is the interface between various end devices and the power supply. Unregulated battery voltage is converted appropriately and supplies compatible hardware with the required operating voltage.

BENEFITS

- **Mobile, thanks to the wireless design**
- **Supports contemporary working philosophies**
- **Flexible in the event of workplace reorganisation**
- **Maximises flexibility and spontaneity**
- **Flexible response to new work situations**
