cerasonar

Hello Christina

how are you? You know that invisible speakers only unfold their ingenious potential if a stable and "rattle-free" substructure is guaranteed. However we know that this is not the case in every building where you or your customers want to enjoy invisible sound.

Since we enjoy being inspired by your projects, our development team has come up with a brilliant alternative!

Our cerasonar architect sub

The small powerhouse with 8" driver delivers an extra kick in multi-room music projects or home cinema applications where you have uncertain or unstable substructure or simply no space for a totally invisible subwoofer.

Thank you for your feedback!

Take care,
Ulrich

Vibration free bass in every room

150 w RMS (300 w max)

Impedance 4 ohms

Frequency range 35 - 100 hz*

Dimensions 30,0 x 20,0 x 20,0 cm (only housing, without parts)

Weight 8,5 kg

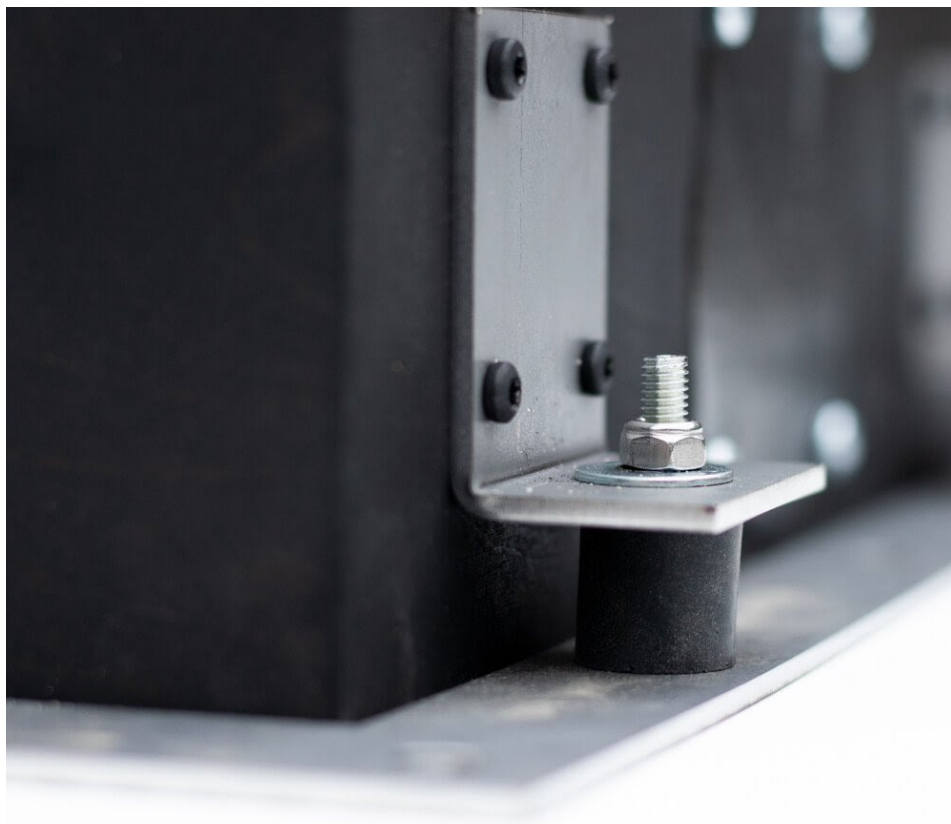

Drywall 1- or 2-layered 12,5 mm plasterboard

* depending on installation situation

What makes this sub so special?

Specially developed vibration dampers on the mounting bracket provide **significant structure-borne sound and vibration reduction for wall and ceiling installations**, making our cerasonar architect sub an ideal solution for apartment buildings or small rooms.

Quick and easy overhead installation

For a **quick and easy overhead installation**, we have equipped our cerasonar architect sub with a light but above all very stable mounting bracket. To fit perfectly into modern interior design, the elegant and small (85 x 85 mm) air outlet has no frame and is thus flush with the wall or ceiling. If a different colour of grille is desired, it can easily be adapted with a conventional paint spray.

Thanks to your feedback ...

... **we can constantly improve our service.** Some of you have asked for further information material that you can pass on to your customers. Our design team has therefore prepared a small leaflet for inspiration. Please reply to this email so we can send you the first selection.

Thank you for your trust and passion!
