

SHALLOW DEPTH LOUDSPEAKERS

THE OH-NO SPEAKER

The ThinFit Collection mounts with less than two inches of clearance, perfect for those oh-no moments when there's a surprise behind the drywall. The multiple woven glass-fiber woofers provide a surprising amount of low-end and volume, with the clarity and musicality you expect from Origin Acoustics. Available in three designs, two for ceiling applications and one D'Appolito model for in-wall use. All three models are timbre-matched to the

7-series of both our in-wall and in-ceiling speakers. This way, they can be utilized in combination with our other collections without a noticeable difference in sound quality or tone. This collection also makes use of our DPSD™ tweeter, resulting in a smoother blend from the tweeter to the woofer. Also, as a result of the tweeter's lower cross-over point, the woofers provide more clarity in the midrange.
