

Panel Mechanism & Flat panel Floor/Furniture Lift

New ideas, driven from clients' requests!

The new panel extension mechanism, **PA-WLH series**, designed by Unitech Systems, provides horizontal extension from wall or furniture surface level up to 250mm, giving the ability for your flat panel to appear from inside the wall.

Combined with FPLTS flat panel floor/furniture lifts or with FPLTSR flat panel floor/furniture lift with side rotation, PA-WLH series provide complete disappearing of your flat panel with no compromises in their utility!

Panel Mechanism & Flat panel Wall/Ceiling Lift

An additional unique solution is provided by the **PA-WLH series** of mechanisms, with the additions of FPLWV1 series of lifts, hiding the TV set inside the wall and behind any art work or decoration element preferred by the client.

Limitless utility and elegance in every application!
