

MONOCLIP

Best of both worlds

The new MONOCLIP projection screen combines all the advantages of AV Stumpfl's highly acclaimed MONOBLOX mobile projection screens with the added advantage of a full clean profile without studs and press snaps.

THE MONOCLIP DIFFERENCE

Combining innovation and experience

The MONOCLIP's entire frame block unfolds and the snap joints lock automatically, which also means that no parts can get lost during the intuitive setup process. A very low total cost of ownership and European manufacturing precision add to the appeal of this innovative projection screen system.

VARIO

The classic mobile projection screen

Vario is the original mobile projection screen featuring a modular structure. When we entered the rental & staging market over 40 years ago Vario was our product with which we built our reputation. Precisely manufactured and lasting virtually forever this product has continuously been improved and will keep its place in the international rental & staging industry in future especially for custom sizes or long term set ups.

THE VARIO SYSTEM

Variable and custom in size

Vario® can be made to measure since it is a modular system consisting of a basic frame that can be sized to any format by adding or removing plug-in elements.

Three different connections are available to connect the plug-in elements together depending on the projection screen's application and size:

- ✓ Plug-in connection
- ✓ Screw connection
- ✓ VarioLock™ connection

VARIOCLIP®

Redefining the mobile projection screen

Further developed from the original Vario product VarioClip® is the world's first mobile projection screen featuring a full clean profile without any studs and press snaps. Surface tension can be adjusted to ambient temperature with best frame stability and accuracy.

VarioClip® surfaces are attached to the frame using the patented hook technology QuickClip which simplifies handling to a maximum.

VarioClip® is the most technologically advanced modular mobile projection screen. Engineered and manufactured with 40 years of experience as the market leader and can be made to measure.

SURFACE ATTACHMENT WITH QUICKCLIP

The revolution

Our patented QuickClip hooks define the core of our new mobile projection screen development. This new surface attachment technique has been engineered and intensively tested for more than 5 years. Among the features of QuickClip surfaces are:

- ✓ Simple and stress-free attachment
- ✓ Easiest set up
- ✓ Automatic tension distribution
- ✓ Hook made of glassfibre reinforced material
- ✓ Integrated spring element to prevent unintended hooking
- ✓ Anti-reflective rubber coated cover caps
